Your patients will LOVE you!

**Stop grafting, start closing.**

DermaClose gives your patients a **more attractive**, **less painful**, and **more satisfying** option with no donor site.

In a recent independent survey with 63 surgeons:

- **40%** of surgeons are not confident of achieving a good clinical outcome with skin grafts.
- **50%** of surgeons believe skin grafts have a high risk of complications.
- **75%** of surgeons believe their patients are not satisfied with the results of skin grafts.

This same survey found that 99% of surgeons believe high patient satisfaction is the most important factor in considering a course of treatment.
